ARTS IN EDUCATION RESIDENCY PROGRAM

Northern Tier Partners for the Arts is a partnership program of the Bradford County Regional Arts Council and the Pennsylvania Council on the Arts.

What is an Artist Residency?

Northern Tier Partners for the Arts and PA Council on the Arts facilitate the Arts in Education program to provide intensive, on-going arts experiences that inspire, stimulate, and affirm creativity in the community. Residency programs support arts education activities that have substantial impact beyond the residency itself.

How it works

A residency is where an artist comes in to an organization and conducts workshops or in-class presentations. The artist will consult with students to develop creative capabilities, decision making, and technical skills. Residencies should be focused on student outcomes relating to sound artistic processes.

Who is eligible

Eligible residency host sites can be any 501 (c)3 organization (typically a school or community organization) wishing to enhance existing curricula and goals and/or provide hands on artistic experiences for students, residents, educators, and community members.

Costs and Requirements

- Residencies must be at least 10 days. Days do not need to be consecutive.
- All sites must provide a clean, well-lit, heated and properly ventilated space, furnished with necessary furniture, equipment and supplies for the artist to work with site population
- Artwork that is produced by a student as a part of a residency remains the property of the student.
- Costs include: daily artist fee and an administrative fee (10% total residency cost). PCA does not match the cost of supplies.
- Mileage reimbursement is added into the daily artist fee.

Funding

A 10-day residency is eligible to receive *up to* 30% of the total cost of the residency. 15 days is eligible for *up to* 40%, and a 20-or-more day residency can receive *up to* 50%.

Did you know?

“Students who study art are four times more likely to be recognized for academic achievement and three times more likely to be awarded for school attendance.”

“Participation in arts interventions has been linked with improving cognitive function and memory, general self-esteem and well-being, as well as reducing stress and other common symptoms of dementia, such as aggression, agitation, and apathy.”

“Arts participation and arts education have been associated with improved cognitive, social and behavioral outcomes in individuals *across the lifespan*: in early childhood, in adolescence and young adulthood, and in the later years.”

-National Endowment for the Arts
